Antibacterial Function	Antibacterial Effect 99.9% (Application of Silver Ion Antibacterial Fiber)
Description	<p>[Aerosilver fabric material]</p> <ol style="list-style-type: none"> 1. Advanced silver nano technology, reusable functional fabric 2. The safety standards of domestic and European countries and FDA approved safe Hyosung's Aerosilver silver nano yarns are used to suppress microbial growth and ensure strong antibacterial activity. The fabric does not lose its elasticity even if it is washed several times. 3. which responds to external harmful environments, a moisture-absorbing and cold-absorbing material that is in direct contact with the skin and has a moisture-drying and antibacterial deodorizing function. 4. It gently covers the cheeks and does not cause ear pain. Even after long-term use. Comfortable fit every moment. 5. uses dyes that are harmless <p>[MASK Design Product Information]</p> <ol style="list-style-type: none"> 1. We Launched a new style of mask with Utility loop designed to fit perfectly on the face. 2. The Utility loop can hold a mask strap or earphone cable. 3. Mask can provide a more comfortable life indoors and outdoors. <p>We added art and ideas to the fashion mast. You are now free to run for safe masks and wonderful health. Because the differentiated idea of hanging earphones and face mask necklaces on the bottom of face masks is only available to you.</p> <p>* "Fashionable everyday masks for private use only. Not for medical purposes or as personal protective equipment"</p>  <p>The image contains several components related to the Aerosilver product:</p> <ul style="list-style-type: none"> Aerosilver Logo: A stylized 'aerosilver' logo with a red and blue circular graphic above the 'o'. Text Description: "aerosilver is. It exhibits strong antibacterial and quick-drying functions. It is a new concept composite functional material." Antibacterial Effect Diagram: A diagram showing the antibacterial mechanism. It compares "Post-processed antibacterial treatment fabric" with "aerosilver". The aerosilver diagram shows "Antibacterial (Silver(Ag+))" ions being released from the "fiber" to the "skin", inhibiting bacteria. UV Blocking Diagram: A diagram showing UV rays being blocked by a layer of "aerosilver" fabric. Comparison Images: Two circular images showing "Regular Fabric" and "aerosilver". The aerosilver image shows a more vibrant red color, indicating better color retention or dyeing properties. Product Images: Two images of the "aerosilver" fabric mask, one showing the front and one showing the side with the utility loop. Additional Text: "[Strong antibacterial effect, Sweat perspiration quick-dry, UV blocking]", "aerosilver isStaphylococcus and pneumococcus in a short time, Helps reduce the growth of resistant MRSA.", and "Long Lasting Products".
